

WEDNESDAY, 23 JULY 2025

Lloyd,

I am contacting you in your role as my Social Worker.  
This is in regards to your Duty of Care & Safeguarding, both Legal and Moral, obligations.

Today was not a good day.  
As a result the overriding thought that is circling my brain at the Speed of Sound is this:

**Given what *is* available and not what *might* be - how do I ensure that I am still alive in Five Years?**

The answer is still the same as the one I put down as my Safeguarding Request for the Court to make happen back in February.

What has changed?

Five months & having what I have battled ten years for, someone whom is trained in the diversity specified by the only set of protected characteristics to require a law.

Tonight, could go one of two ways.

Badly or Self-Harm.

I believe I know the answer, more importantly I know why.

I also know how tenuous that Why is, given how nobody else cares.

Which means, please:

**You are to begin the process Social Services has for Court to implemented Safeguarding Requests.**

Given that you explained Social Workers are completely separate to the LA, unlike Safeguarding which is another LA department - I cannot be the first person that has required Court to protect against their LA.

As the 30th is Next week and not this, that will give me time to prepare my Evidence as per the very clear instructions the Head Clerk at Winchester Court gave me to deal with the issue I face.

I will have it ready, safely boxed, for you to take on the 30th - UNLESS doing so goes against the Holistic Nature or me being Safe.

Fortunately, in order to get Safeguarding I do not need evidence, I do not need to justify - all I should do is ask my LA to make me safe and them to ask what that would take for them then to implement.

Yours Sincerely,

SIMON EDGLEY
